

THIS MONTH HORSEMART TRIED AND TESTED THE MICROPERFORMANCE+ ADVANCED SADDLE PAD

• PRODUCT TRIED:

Microperformance+ Advanced Saddle Pad, in size full.

• PRICE:

(at the time of review) **£49.95**

"I was really impressed with this saddle pad. It is very well made and looks high quality with the 6mm cord detail, adding a touch of luxury. I was concerned that it would be quite thick, due to the layered materials, but was pleasantly surprised that this wasn't that case and my saddle fit was unaltered. It has a great mesh fabric underside, which wicks away sweat keeping the horse relatively dry underneath. It's a smart enough saddle pad for competitions, as well as being an asset for schooling work at home. The only thing I would like to see, is a wider choice of colours, it would be nice to have some brighter designs.

I highly recommend this saddle pad, particularly to anyone with a horse that does get hot. It keeps the saddle in place nicely and keeps the horse cool, whilst looking smart."
